Evan James Haala

Open-minded and approachable team player who enjoys the success of my peers as much as my own. Eager to utilize my meticulous mindset to find simple solutions for complex problems while continuing to grow as a web developer.

PROJECTS

Gymder

Designed and developed a responsive web app using Node and PostgreSQL. Incorporated Google Places API to allow users to search for local gyms and connect with other gym-goers.

HabiTrack

Assisted with design and development of a MERN stack habit tracking app with three other developers.
